

# Resetting TPC Passwords

If a TPC has not received their launch email, you can trigger a new one by resetting their password.

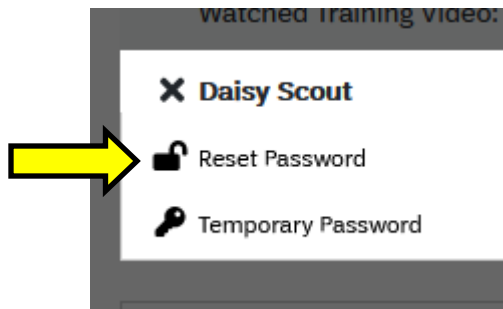

1. From the dashboard, click on "Manage Admin Users"

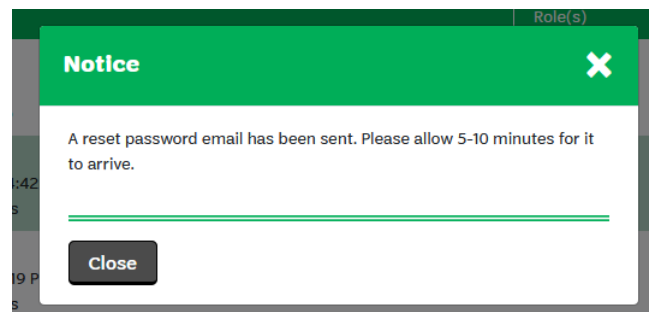

2. Then click on the "+" next to their name.

3. Then click on the "Reset Password" option.

4. Then you'll see the notice popup letting you know the email has been sent.

5. Please follow up with the volunteer and make sure they have received the reset email.
